- **Numerous.ai** – Spreadsheet insights, data cleaning, automation

- **ExcelFormulaBot** – Converts natural language into Excel formulas

- **Codeium** – Free AI coding assistant

- **GitHub Copilot** – AI-powered code completion

- [Khanmigo (Khan Academy)](#) – AI tutor for math, coding, writing

- [Phind](#) – AI search engine specifically for coding queries

---

Powerful ChatGPT Prompts to Try Today for Resume Building:

"Act as an expert resume writer. Help me craft a bullet point for a marketing internship where I handled Instagram growth from 1K to 10K."

"Rewrite my resume in a more impactful way for a data analyst role using these key skills: Excel, SQL, Tableau."

For Mock Interviews:

"Conduct a mock interview for a Product Manager role at a tech startup. Ask me 5 questions one by one and give feedback."

"Ask me 3 behavioral questions for a consulting role and provide suggestions on how to improve my answers."

For Cold Emails:

"Write a polite and compelling cold email to request an informational interview with a product manager at Google."

For Learning Summaries:

"Summarize the key concepts from the book 'Atomic Habits' in bullet points."

"Summarize this Coursera course description and give me the 3 most important skills I'll learn."

For Cover Letters:

"Write a cover letter for a Business Analyst internship using my resume points and job description below."

For Case Study Prep:

"Give me a basic market entry framework to solve a consulting case on entering the organic skincare market in India."

For Excel Help:

"I have a dataset with dates and sales figures. Write a formula that calculates total sales from the last 30 days."

"Generate an Excel formula that highlights duplicate values in Column A."

"Convert the sentence 'add column B and C only if column A is greater than 100' into a formula."

"Give me a formula to calculate CAGR over 5 years."

For Code Debugging:

"Here's my Python code for a sorting algorithm. It's not working as expected. Can you help me debug it?"

"Write a Java program to find the second largest number in an array." "Explain how this SQL JOIN query works and suggest improvements."

For Upskilling s Career Growth:

"Suggest 5 free certifications I can complete this month to strengthen my resume as a marketing student."

"What are the top beginner projects I can build to practice my data science skills?" "Create a 4-week study plan for learning advanced Excel and Power BI."

Tips to Use AI Effectively

- Don't copy-paste. Customize outputs to your voice.

- Feed it context: The better your input, the sharper the output.

- Use AI for ideation and improvement, not substitution.

- Cross-check AI-generated facts.

- Treat AI as your thinking partner, not your brain replacement.

How to Build an AI-Boosted Workflow as a Student/Professional

Morning: Use AI to create a task list, journal entry, or learning plan
Midday: Use AI to summarize meeting notes, emails, or LinkedIn posts
Evening: Use AI to reflect, create content, prep for interviews, practice coding or automate Excel reports

Use Notion AI + ChatGPT together to supercharge your productivity and learning.

The students and professionals who will win in this decade are the ones who learn **how to think with AI**, not fear it. Whether it's writing, coding, preparing, learning, or applying — start small, but start today.

AI isn't your competition. It can be your career companion.
